

## **OPEN WEB TRIMMABLE TRUSS WITH SELF LOCKING JOINT**

### **ABSTRACT OF THE DISCLOSURE**

5 A wood containing, open web trimmable truss assembly composed of opposed chord members defining an open web central structure that is bounded at each ends by a closed, trimmable end block. The open web central structure is formed by a plurality of web elements attached to the chord members via a mortise and tenon coupling. The trimmable end block is attached to both chord members and the outer most web element.
